MS/PhD Medicinal Chemists

Eternity Bioscience Inc. in Cranbury, New Jersey, USA, is a wholly owned subsidiary of Hengrui USA which is the US subsidiary of Jiangsu Hengrui Medicine Co., Ltd, China's top pharma with the largest drug stock value on Shanghai Stock Exchange. Our mission is to deliver high quality and translational preclinical drug candidates for critical medical needs. With recent expansion of its New Jersey operation and site relocation to a lakeside research building, the company is seeking three well-qualified candidates to join its medicinal chemistry division in drug discovery research. The successful candidate will be proficient in working independently and collaboratively as part of multidisciplinary project teams and have the capacity to quickly adapt to project priority changes.

Job Description:

1. Execute the synthesis, purification and characterization of small molecules efficiently.
2. Propose and explore synthetic routes, and troubleshoot reactions and multistep reaction sequences.
3. Prepare reports and deliver internal presentations in a timely manner.
4. Assume responsibility for laboratory equipment, ensure that they are properly maintained and serviced, and facilitate their use by other scientists.

Basic requirements:

1. MS in Organic/Medicinal Chemistry, preferably with at least 3 years of experience in pharmaceutical or biotech companies or PhD in Organic/Medicinal Chemistry, with 0-3 years of postdoctoral experience;
2. Sound knowledge in organic chemistry and reaction mechanisms;
3. Experience in synthesis, purification and analytical characterization including HPLC, MS, NMR, Combiflash, etc;
4. Proficient in mining scientific literature and using Scifinder, Reaxys, etc;
5. Good written and oral communication skills and effective team player.
